

WORLD COMMISSION ON ENVIRONMENT AND DEVELOPMENT

SEVENTH MEETING  
Moscow, U.S.S.R.  
December 6 - 12, 1986

WCED/86/39

DRAFT TABLE OF CONTENTS

ACTION REQUIRED: For Discussion and Approval

November 28, 1986

W0208C/WHL

## TABLE OF CONTENTS

### P A R T I.

#### Chapter 1: A Threatened Future?

- I. The Current Crisis
- II. The Development Connection
- III. The Mounting Risks
- IV. Growth of Public Concern
- V. Retrieving the Future

## Chapter 2: Towards Sustainable Development

- I. The Concept of Sustainable Development
  - 1. Human Needs
  - 2. The Resource Base
  - 3. Policy Linkages
- II. Equity and the Common Interest
- III. Strategic Imperatives
  - 1. Reviving Growth
  - 2. Changing the Quality of Growth
  - 3. Meeting Essential Human Needs
  - 4. Ensuring a Sustainable Level of Population
  - 5. Dealing with an Urban World
  - 6. Conserving and Enhancing the Resource Base
  - 7. Reorienting Technology and Managing Risk
  - 8. Merging Environment and Economics in Decision Making
  - 9. Strengthening International Cooperation
- IV. Conclusion

### Chapter 3: The Role of the International Economy

- I. The International Economy, the Environment, and Development
- II. Decline in the 1980s
  - 1. Sub-Saharan Africa
  - 2. Latin American Debt
- III. Enabling Sustainable Development
  - 1. Enhancing the Flow of Resources to Developing Countries
    - 1.1 Linking Adjustment Policies
    - 1.2 Targeting Aid
    - 1.3 Environmental Assessment
    - 1.4 Automaticity and Conditional Financial Flows
  - 2. Linking Trade, Environment, and Development
    - 2.1 International Commodity Trade
    - 2.2 International Trade in Manufactured Goods
    - 2.3 The Mandates of Multilateral Trade Forums
  - 3. Ensuring Responsibility in Transnational Investment
  - 4. Broadening the Technological Base
    - 4.1 The Diffusion of Environmentally Sound Technologies
    - 4.2 Building Up Technological Capabilities in Developing Countries
    - 4.3 Co-operative Ventures for Technology Development
- IV. A Sustainable World Economy

P A R T I I.

Chapter 4: Achieving Human Resource Potential

- I. The Population Perspective
  - 1. Growth in Numbers
  - 2. Changes in Mobility
  - 3. Improved Health and Education
- II. Links to Environment and Development
- III. Population Policies for Sustainable Development
  - 1. Managing Population Growth
  - 2. Managing Distribution and Mobility
  - 3. Strengthening International Support
- IV. Human Resource Development
  - 1. Improving Health
  - 2. Education for Environment
  - 3. Protecting Vulnerable Groups

## Chapter 5: Food Security: Sustaining the Potential

- I. Achievements
- II. Signs of Crises
  - 1. Impact of Subsidies
  - 2. Neglect of the Small Producer
  - 3. Erosion of the Resource Base
    - 3.1 Degradation of Soil Resources
    - 3.2 Impact of Chemicals
    - 3.3 Pressure on Forests
    - 3.4 Advancing Deserts
- III. The Challenge
- IV. Strategies for Sustainable Food Security
  - 1. Promote a Global Perspective
  - 2. Reorient Government Intervention
  - 3. Sustain and Enhance the Resource Base
    - 3.1 Promote the Best Use of Land
    - 3.2 Restore Destroyed Lands
    - 3.3 Improve Water Management
    - 3.4 Develop Alternatives to Chemicals
    - 3.5 Integrate Forestry and Agriculture
    - 3.6 Promote Aquaculture
  - 4. Increase Productivity and Yields
    - 4.1 Strengthen the Technological Base
    - 4.2 Build Up Human Resources
    - 4.3 Increase Input Productivity

Chapter 6: Energy: the Power to Develop

- I. Energy Choices for Survival and Development
- II. Unsustainable Trends
- III. A High or Low Energy Path?
  - 1. Consequences for the Global Economy and Environment
  - 2. Priorities for Survival and Development
- IV. Energy Efficiency: Maintaining the Momentum
  - 1. Transport
  - 2. Industry
  - 3. Agriculture
  - 4. Buildings
  - 5. Conclusions
- V. Renewable Energy: Untapped Potential
  - 1. Improving Future Prospects
  - 2. Conclusions
- VI. Wood Fuels: The Vanishing Resource
  - 1. The Spreading Emergency
  - 2. Conclusions
- VII. Fossil Fuels: Pollute and Pay
  - 1. Reducing Urban-Industrial Air Pollution
  - 2. Preventing Acidification
  - 3. Managing Climatic Change
  - 4. Conclusions
- VIII. Nuclear Energy: The Unsolved Problem
  - 1. The Nuclear Dilemma
  - 2. Conclusions

**Chapter 7: Industry: Producing More from Less**

- I. Impacts on the Environment
  - 1. Pollution of Environmental Resources
  - 2. Growing Hazards
  - 3. Degradation of the Natural Resource Base
  - 4. Transboundary and Global Reach
- II. Opportunities for Improvements
  - 1. Response to Pollution and Resource Degradation
  - 2. Benefits of Environmental Management in Industry
- III. New Patterns of Industrial Growth
  - 1. The Changing Structure of World Industry
  - 2. Declining Role of Energy and Raw Materials
  - 3. Promises and Risks of New Technologies
- IV. A Responsive Policy Framework
- V. Strategies for Sustainable Industrial Development
  - 1. Establish Environmental Goals, Regulations and Standards
  - 2. Make More Effective Use of Economic Instruments
  - 3. Expand and Extend Sustainability Assessments
  - 4. Increase Capacity to Deal with Industrial Hazards
    - 4.1 Chemicals
    - 4.2 Hazardous Wastes
    - 4.3 Industrial Accidents
  - 5. Strengthen International Efforts to Help Developing Countries

## Chapter 8: World Cities Challenge and Opportunities

### I. The Nature of the Urban Challenge

1. Towards an Urbanized World
2. The Many Faces of Cities

### II. The Third World Urban Situation

1. The Lack of Jobs
2. The Shelter Gap
3. Poverty, Pollution and Environmental
4. Institutional Weakness
5. Urban Bias

### III. Confronting the Urban Crisis in Developing

#### 1. National Urban Strategies

- 1.1 Macroeconomic and Sectoral Policies to Serve Urban Goals
- 1.2 Strengthen Local Government Power, Institutions Expertise and Access to Resources
- 1.3 Strengthen Local Governance and Citizens' Participation
- 1.4 Improve Housing and Services for Lower-Income Groups
- 1.5 Develop Small and Intermediate Urban Centres
- 1.6 Tapping Poorly Used Resources in Urban Areas

#### 2. International Cooperation

- 2.1 Increase and Improve Development Assistance
- 2.2 Increase Aid and Financial Flows
- 2.3 Emergency Aid
- 2.4 Strengthening and Supporting Local Government
- 2.5 Working with NGOs and Community Organizations
- 2.6 Promote Urban Development Technologies
- 2.7 Involve UN Specialized Agencies
- 2.8 Strengthen Collective Self-Reliance

### IV. Towards Cities of the Future

Chapter 9: Disappearing Species:  
A Major Resource and Development Challenge

- I. Introduction
- II. The Problem: Character and Extent
- III. Extinction of Patterns and Trends
  - 1. Extinction Rates: Past and Present
  - 2. The Special Case of Tropical Forests
  - 3. Extinction Rates: Future
  - 4. Tropical Forests and Climatic Change
- IV. Economic Values at Stake
- V. Some Causes of Extinction
  - 1. Population Growth
  - 2. Developing-World Poverty
  - 3. Developed-World Consumerism
- VI. National Ecosystems of International Importance
  - Rights and Activities: Exclusive and Inclusive
- VII. Scope for International Action
  - Some Initiative Underway
- VIII. Harmonizing Economic Growth and Species Conservation
- IX. Scope for National Action
  - 1. Priority-Ranking Strategy
  - 2. Integration of Wildlife Conservation with Sustainable Development
- X. The Issues Awakening: Signs of Hope
- XI. Conclusions

P A R T I I I.

Chapter 10: Managing the Commons

- I. Oceans: The Balance of Life
  - 1. The Balance Under Threat
  - 2. Three Management Imperatives
  - 3. The Law of the Sea
  - 4. Establish a Management Regime for the Oceans
    - 4.1 Strengthen Fisheries Management
    - 4.2 Control Ocean Disposal of Waste
    - 4.3 Strengthen Regional Action
    - 4.4 Concert National Action and International Co-operation
  - 5. Clarify Institutional Responsibilities
  - 6. Strengthen Institutions in Developing Countries
  - 7. Initiate and Intensify Exchange
  - 8. Develop Inventories of Coastal Resources
  - 9. Establish an International Ocean Forum
- II. Antarctica: Building on Achievements
  - 1. Options for the Future
  - 2. Guard Present Achievements
  - 3. Anticipate Pressures for Mineral Development
  - 4. Expand Participation in Management
  - 5. Establish Broad-Based Fora for Consultation
- III. Space: A Key to Sustainable Development
  - 1. Monitoring the Biosphere from Space
    - 1.1 Current Activity in Biospheric Monitoring
    - 1.2 Recent Proposals for Increased, Internationally Co-ordinated Biospheric Monitoring
    - 1.3 Options for International Co-operation in Biospheric Monitoring from Space
  - 2. Geosynchronous Orbits (To be written)

3. The Pollution of Orbital Space

3.1 The Hazard Posed by Space Debris

3.2 Space Debris from Space Weapons Tests: The  
Emerging Threat

3.3 Options for International Response

4. Nuclear Reactors in Orbit

4.1 Threat to Biosphere

4.2 Options for Control

5. Toward a Space Regime

**Chapter 11: Peace Security and Environment**  
(To be drafted after Moscow)

## Chapter 12: From Common Concerns to Common Action

- I. The Challenge to Change
  - 1. Poverty, Degradation and the Declining Potential for Development
  - 2. Confronting New Realities
  - 3. New Threats to Security, Peace and Survival
  - 4. Looking Beyond National Boundaries
  - 5. The Growing Gap
  
- II. New Directions for Change
  - 1. Shifting the Focus from Symptoms to Sources
  - 2. The Symptoms Mandate
  - 3. The Sources Mandate
  - 4. Coping with the Momentum of Mal-Development
  - 5. Strengthen the Legal Framework
  
- III. Priority Thrusts for Institutional and Legal Change
  - 1. Getting at the Sources
    - 1.1 Reorienting National Institutions and Policies
    - 1.2 Reorienting International Institutions and Programmes
  - 2. Dealing with the Symptoms
    - 2.1 Strengthening National Environmental Protection and Natural Resources Management Agencies
    - 2.2 Strengthening Existing Global
      - 2.2.1 The United Nations Environment Programme
      - 2.2.2 The International Union for Conservation of Nature and Natural Resources
      - 2.2.3 The United Nations Habitat and Human Settlements Programme
  - 3. Ensuring Survival
  - 4. Reconciling Rights and Responsibilities
    - 4.1 Establish the Basic Rights

- 4.2 A Universal Declaration and a Convention on Environmental Protection and Sustainable Development
- 4.3 Strengthen and Extend Existing International Conventions and Agreements
- 4.4 Avoiding and Settling Disputes on Development-Based Environmental Resource Management Issues
- 5. Managing the Commons
- 6. Taking Effective Regional Action
  - 6.1 Strengthen Existing Regional Organizations
  - 6.2 Establish Regional and Sub-Regional Organizations
  - 6.3 Focus on Ecological Units
- 7. Making Informed Choices
  - 7.1 Non-Governmental Organizations (NGOs)
  - 7.2 The Scientific Community
  - 7.3 Industry
- 8. Investing in our Future
  - 8.1 New Sources of International Financing
  - 8.2 A World Conservation Bank or Special Facility
  - 8.3 New Sources of Revenue and Automatic Financing
